PROFILE

I am Mariam Sajaia, a Junior Frontend Developer with a strong interest in creating modern, responsive, and user-friendly websites. I am currently at the beginning of my professional journey, but I have a solid foundation in HTML, CSS, and JavaScript, along with the motivation and potential to continuously grow and improve my skills. In addition to frontend development, I am also interested in digital marketing and online advertising. I have experience with creating and managing promotional content and social media advertising, which helps me understand not only how a website should look and function, but also how it can effectively reach and engage its audience. I am motivated to gain practical experience, explore new technologies, and grow into a skilled and well-rounded Frontend Developer.

EXPERTISE

Frontend Development 75%

Responsive Web Design 70%

Web UI Development 75%

Digital Marketing & Meta Ads 90%

CAPABILITIES

UI/UX

Focusing on user flow and interface architecture, with active ongoing development in advanced design systems.

App Design

Currently exploring mobile interface guidelines and cross-platform UI patterns as part of my learning roadmap.

Web Design

Core specialization in building pixel-perfect, highly responsive websites with semantic HTML5, CSS3, and JavaScript.

Graphic Design

Actively mastering vector graphic tools, visual branding, and digital illustration to complement frontend projects.
